

System requirements

The SOFiSTiK products in Version 2010 have been developed, tested and released for Windows XP Professional (SP3), the 32-bit Windows Vista Business and Windows 7 Professional (parts also for 64-bit, see below).

Similarly, the products based on the AutoCAD platform have been developed, tested and released on the current German and English versions of AutoCAD. For the SOFiCAD 2010 version 18.1, this corresponds to AutoCAD 2011, for SOFiPLUS 2010 17.3, it corresponds to AutoCAD 2009.

Only SOFiSTiK products that have been installed on this Operating Systems and AutoCAD platforms will be supported.

Installation and use of SOFiSTiK products might be possible on other Windows operating systems such as Windows 2000 or Vista-Home and Windows 7 Home Premium, but we do not perform QA for that.

In almost the same manner SOFiSTiK Autodesk based products might run on vertical Autodesk products such as AutoCAD Architecture. As well we have no QA for these possible constellations.

However, our helpdesk will try to assist you and to answer your questions.

Product	Version	Operating System	AutoCAD-Version
SOFiCAD	17.2	XP Professional / Vista Business 32-bit	AutoCAD 2008/2009
	2010 18.1	XP Professional / Vista Business 32-bit/ Windows 7 Professional 32-bit	AutoCAD 2010/2011
Statik / SOFiPLUS-X	23 / 16.4	XP Professional / Vista Business 32-bit	
	2010	XP Professional / Vista Business 32 & 64-bit/ Windows 7 Professional 32-bit & 64-bit
